

The diagram consists of two main rectangular blocks. The top block is light green and contains the text 'User Interface Module'. The bottom block is light red and contains the text 'Audio Driver Module'. The bottom block has a large white rectangular cutout in its center. The top edge of this cutout is not straight; it has a V-shaped notch pointing upwards and two side notches pointing outwards. The green block has a corresponding shape on its bottom edge: a V-shaped protrusion pointing downwards and two side protrusions pointing inwards, which perfectly fit into the side notches of the red block's cutout. This visualizes a modular or plug-and-play architecture.
